

## Desmoglein 3

PLD-297

Package : 可询价

**Product Name** : Desmoglein 3**Cat.No.:** PLD-297**Synonyms** : PVA; CDHF6**Application** : IHC-P**Reactivity** : Human**Host species** : Rabbit

### Background

This gene encodes a member of the desmoglein family and cadherin cell adhesion molecule superfamily of proteins. Desmogleins are calcium-binding transmembrane glycoprotein components of desmosomes, cell-cell junctions between epithelial, myocardial, and other cell types. The encoded preproprotein is proteolytically processed to generate the mature glycoprotein. This gene is present in a gene cluster with other desmoglein gene family members on chromosome 18. The encoded protein has been identified as the autoantigen of the autoimmune blistering disease pemphigus vulgaris. [provided by RefSeq, Jan 2016]

**Gene ID**

1830

**Swiss Prot**

P32926

**Synonyms**

PVA; CDHF6

**Reactivity**

Human

**Application**

IHC-P

**Recommended dilution**

1:200

**Host species**

Rabbit

**Clonality**

Monoclonal

**Isotype**

IgG

**Purity**

Affinity Purification

**Conjugation**

Un-conjugated

**Storage Stability**

Store at -20°C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.
